CONSULTING SURGEONS :

WILLARD PARKER, M. D. | THOMAS M. MARKOE, M. D.

HOUSE PHYSICIAN AND SURGEON :

S. TELLER, M. D.

REPORT.

THE DIRECTORS of THE MOUNT SINAI HOSPITAL submit to its Members their Report for the year 1866—5626-27.

By reference to the Report of the Executive Committee, it will be perceived that during the year 1866 there were 594 applications for admission to the Hospital,

Of which number were admitted	530	
Born in Hospital	6	
Remaining Jan. 1, 1867.....	33	
		—569
Of these were discharged cured.....	411	
“ “ “ improved.....	63	
“ “ “ not improved.....	6	
“ left before treatment.....	4	
“ died	41	
Remaining in Hospital Jan. 1, 1867.....	44	
		—569

There were also 459 patients treated outside of the Hospital.

The causes of death are fully set forth in the Report of the Executive Committee; also, some interesting surgical and medical cases treated in the Hospital.

It will be observed by reference to the Report of the Finance Committee, the amount received from voluntary donations was \$ 2,941,18, and from the Charitable Fund of the State of New York was \$ 1,948,81; these sums, with the dues of members, which have largely increased during the past year, have enabled the Directors to add to the Permanent Fund of the Hospital the sum of two thousand dollars.

The expense of supporting the Hospital for the ensuing year are estimated by the Executive Committee at about \$ 16,000, and the resources and income which can be relied upon, amounts to Eight Thousand Dollars, showing a deficiency of Eight Thousand Dollars.

The Directors feel confident that a generous public will contribute to the funds of the Hospital, by donations and an increase of members, so as to enable them to continue its charitable purposes.

The attention of the members is respectfully called to the suggestion of the Executive Committee, in reference to the location and suitable accommodations of the Hospital, and we cannot refrain from expressing the opinion that the building is inadequate to its requirements and unsuitable to the purposes of such an institution.

Rev. Drs. Raphael, Lyons, Isaacs and Adler continue to pay periodical visits to the Hospital, administering consolation to the sick.

The Medical and Surgical Staff give general satisfaction. Great credit is due to them for their valuable services, gratuitously rendered.

The House Physician, Dr. Teller, continues to discharge his duties with ability and satisfaction.

In conclusion, the Directors submit their Annual Report to the Members and Patrons of the Hospital, and trust, through their liberality, the sphere of the Institution may be extended and its usefulness increased.

All of which is respectfully submitted,

BENJAMIN NATHAN,.....	<i>President,</i>	} <i>Directors.</i>
EMANUEL B. HART,.....	<i>Vice-President.</i>	
JOSEPH FATMAN,.....	<i>Treasurer.</i>	
SAMUEL A. LEWIS,.....	<i>Hon. Secretary.</i>	
LEWIS MAY,	S. J. SPIEGELBERG,	
H. ARONSON,	ANSEL LEO,	
J. M. LAURENCE,	S. L. COHEN,	
WM. SELIGMAN,	HENRY GITTERMAN,	

REPORT OF FINANCE COMMITTEE.

THE FINANCE COMMITTEE respectfully report to the Directors that the total receipts from all sources during the year amount to \$24,770 69; the balance in the hands of the Treasurer on the 1st January, 1866, was \$8,059 15; and the disbursements during the same period was \$32,865 11; showing a balance due the Treasurer on the 1st January, 1867, of \$35 27.

Of the amount of \$8,059 15 in the hands of the Treasurer on the 1st January, 1866, \$7,000 was from a bond and mortgage paid in a few days previous; and of the receipts for this year, \$8,000 was from the same source. During the same period, \$17,000 was placed on bond and mortgage, thereby increasing the Permanent Fund \$2,000. The receipts from all sources (except bonds and mortgages paid in) was \$16,770 69, which, with \$1,059 15 in the Treasury (belonging to the General Fund) on the 1st January, 1866, amounted to \$17,829 84.

The amount paid for the support of the Institution during 1866 was \$15,865 11—added to the Permanent Fund \$2,000—is \$17,865 11, showing balance due the Treasurer \$35 27.

The annexed Statement shows the receipts and expenditures under the specific classes. The Committee refer the Directors to the Report of the Executive Committee for a detailed account of the expenditures.

Your Committee again call the attention of the Directors to the fact that, owing to the enormous increase in the price of provisions, medicines, &c., the interest on the present fund and receipts are inadequate to meet the expenses of the Hospital.

In conclusion, your Committee submit their Report to the Directors, in the hope that the Hospital may continue its usefulness, and attain that position to which its charity entitles it.

All of which is respectfully submitted,

BENJAMIN NATHAN,	} <i>Finance</i> <i>Committee.</i>

REPORT

OF THE

EXECUTIVE COMMITTEE FOR 1866.

TO THE PRESIDENT AND BOARD OF DIRECTORS OF THE MOUNT
SINAI HOSPITAL:

The Executive Committee respectfully present their Annual Report for 1866.

The Hospital has passed, under Divine protection, through another year of successful operation, and it is again the privilege of the Executive Committee, in submitting the annual statement of their stewardship, to congratulate the Board of Directors on its undiminished usefulness.

Your Committee have held fifty-five meetings during the past year (1866—5626—7). The number of applications entertained was 594; the number of patients admitted was 536; whilst 58 were rejected because they were, morally considered, unfit subjects for the Hospital, or because their cases were deemed either contagious or incurable, and at times patients were unavoidably refused admission, there being no room for their accommodation.

Of the number admitted 42 were pay patients.

The average number daily treated was $43\frac{1}{4}$; and the average of deaths during the year was $7\frac{1}{5}$ per cent.

Your Committee deem it proper to state that there were 40 cases of Consumption admitted, of which 12 died. These applications were not rejected on the ground of being incurable, because the physicians thought they were susceptible of relief; and it is a source of satisfaction to know that by kind treatment their sufferings have been materially mitigated, which would not have been the case were they permitted to linger out a wretched existence, uncared for, in the midst of poverty and want.

The Hospital remains, among kindred charities, one of the glories of the Hebrew people in New York, and, as the details of its working may show, there is great cause to rejoice at the signal services it is daily rendering our brethren in distress. From the design of the Institution its charity is necessarily of a comprehensive nature, and not restricted to any one particular act of kindness. Here the hungry are fed; the naked are clothed; the sick are healed; and even when death ensues, *that* feature of beneficence, so highly cherished among our people, is not neglected—the mortal remains are decently and properly consigned to the consecrated grave, amidst the sacred rites of our ancestral faith.

Thus it will be seen what a variety of claims there are upon its funds, which a reference to Tables 1 and 2 will more fully explain, and when it is announced that the expenses closely figure to \$1,400 a month, the necessity for immediate resuscitation of its means will be apparent to all.

Whilst last year the number of its subscribers was but six hundred, your Committee are glad to state it has been since increased to nearly one thousand. They look forward most hope-

fully for a further accession, and trust the interest lately evinced may continue unabated, until our noble charity is made self-supporting.

As your Committee review the records of last year, they are reminded of the favors of several kind friends, who have generously contributed donations, in money, to the funds of the Institution, and also, for many articles of clothing, &c., either furnished gratuitously or without profit. Whilst your Committee gratefully acknowledge their kindness, they trust their example will not fail to incite others to emulate their good deeds.

Your Committee, at their weekly meetings to inquire into the dispensation of your charity, are frequently embarrassed by applicants for assistance upon their withdrawal from the Hospital. It is rarely that the poor Israelite, though stricken by disease, will avail himself of the charity of this Institution before he has fairly exhausted all his means, and upon his recovery he finds himself in a state of destitution so deplorable as to be beyond the reach of individual aid, and for the alleviation of which, no provision is made by our laws. They therefore suggest that some plan be devised to create a special fund, or to secure the co-operation of the several relief societies in behalf of our unfortunate brethren, that upon recovery they may, with cheerful heart and easy mind, return to a life of industry and thrift.

Among the patients treated in the Hospital during the past year, a considerable number were the victims of accidents, brought in by the police, all of whom received, as heretofore, prompt attention without regard to religion or nationality. Your Committee rejoices in the continuance of the liberal principles that have hitherto characterized the charity of this

Institution, where every man is looked on as a brother, entitled to our pity and care in time of need, without distinction of faith.

This triumph of Hebrew liberality has not failed to command both public and private encomiums. (See Appendix).

May it further testify that we are not regardless of the most sublime lesson of our religion, "Love thy neighbor as thyself."

It is with unfeigned satisfaction that your Committee commend the valuable services of their able House Surgeon, Dr. Teller. The zeal and energy with which he continues to discharge the duties of his office, his unwearied watchfulness of the interest of the Institution, his unremitting kindness and attention to the sick, and his voluntary attendance upon outdoor patients, highly entitle him to the acknowledgements of the Board.

To the Medical Staff and Consulting Surgeons, the thanks of the Directors are eminently due. It is to their disinterested faithfulness, that may be greatly attributed the high character the Hospital bears among the kindred institutions in this city, and through their skill and devotion have been realized the high purposes for which it has been called into life.

Your Committee rejoice in stating that the patients continue to be favored with the cheering visits, at stated periods, of the Reverend Ministers in Israel.

By the influence of religion the languishing are inspired with fortitude, and the light of hope is kindled in the midst of despair. We highly prize the services of these gentlemen, and would assure them of our sincerest thanks.

The choice, in September last, of Mr. Schwazbaum, as Superintendent, your Committee have every reason to believe was

a happy one. They are highly pleased with the manner he performs his duties, and think him fully qualified for his responsible position.

The location of the Hospital, we regret to say, becomes daily more and more unpleasant, and its size and accommodations inadequate for the wants of our people. Your Committee would respectfully suggest that some action on the subject be taken by the Board of Directors.

The chief essential, in the locality of a Hospital, is pure air and plenty of it, whilst its surroundings should be cleanly and cheerful, calm and tranquil, in all of which health-promoting requisites, it is to be regretted, the present site is quite deficient. If a removal further up town could be effected, far away from the noise and bustle of active life, with a spacious building suitably adapted for the benevolent and pious purposes of our Society, it would, no doubt, be hailed as a benefit and a blessing by the Hebrew people of New York.*

In conclusion, your Committee pray that the blessings of Providence may ever be showered on the Institution, and that its doors may always be open to alleviate the sufferings of humanity.

NEW YORK, Nov. 8th, 1866, }
 499 5th Avenue. }

SAMUEL A. LEWIS,

*Hon. Secy. Mount Sinai Hospital,
 City of New York.*

MY DEAR SIR :—I have to acknowledge the receipt of your note of the 4th inst., informing me of a resolution passed by your Board on that day, in reference to myself; what little service I may have rendered to your excellent institution, was but a feeble tribute on my part to its worth, for I felt that the truly liberal spirit evinced by, and the self-sacrificing labors of, the gentlemen composing the direction (one of whom is my life-long and valued personal friend), in the cause of suffering humanity, affording as they have and do, to the unfortunate of every faith and nationality, the benefits of their admirably-managed Hospital, eminently entitled them to the respect, confidence and support of their fellow citizens.

May I request that you will do me the favor to convey to the Board, my deep appreciation of the compliment they have paid me, and at the same time permit me to thank you for the courteous manner in which you have made known to me their action.

Very respectfully,

G. E. BALDWIN.

[A COPY.]

From the New York Tribune, May 16.

ANOTHER STEP TOWARD UNIVERSAL BROTHERHOOD.

To the Editor of The N. Y. Tribune.

SIR: It is said religious creeds are different because they come from men, and that morality is everywhere the same because it comes from God. But while differing in mental and physical organization we can no more think alike in all things than look alike; nor is it desirable that we should. In that case, there could be no interchange of thought, and the general mind would stagnate for want of exercise; hence diversities of opinion pervade the world on all topics, lay and religious. But though Separatists in matters of faith, we may all be Unionists in that which is greater than faith. There are no heresies in acts of humanity; in feeding the hungry, clothing the naked, relieving the sick and those who are otherwise in distress. Untainted with selfishness, the impulses of charity are the most ennobling to which our natures can respond.

I was lately most agreeably surprised with an example of this genuine catholicity of kindness, where perhaps few of us would think of looking for it—in the Jews Hospital of this city—an institution which I had supposed dedicated exclusively to that people. It receives and gratuitously treats the poor of every Christian sect, and actually provides for their receiving religious teachings from ministers of their own creeds.

The following extract from the report of the Executive Committee for 1865, must, I think, impart unalloyed pleasure to every enlightened mind. As I believe in the cardinal law of Progress—of the social, civil, intellectual and moral elevation of our entire species—I consider it among other movements of the times, prophetic of a glorious future:

"It is a source of pride to the Executive Committee to be able here, to advert to the liberal principles upon which the system of the institution is founded, and when it is remembered, that no religious disqualification is sanctioned, by which an application in distress may be refused admittance, our charity will at once be acknowledged as the truest and most holy; that makes us recognize in every man a brother, entitled to our pity and care in time of need, without distinction of faith.

"Not alone does the Hospital serve a charitable purpose in affording the poor a place of refuge while suffering from bodily ailments, but it has also been the means of bringing many under the direct influence of religion, through the kindness of the several ministers, who in their converse with the patients, during their visits at stated periods, have urged many to repentance, and thus afforded relief to their mental as well as physical sufferings, for which your Committee would here express their grateful acknowledgements."

Limited as the institution yet is, 111 Christians were received the past year. Verily the world *does* move, the thoughts of men *are* widening, and the walls of separation between sects coming down. How far Christian sympathy is extended to Jews in distress here, I do not know; but I have long known that tears on Christian cheeks are often dried up, and heaving of Christian bosoms calmed, by Hebrew angels of mercy. For example: a Southern female came here with two small children in extreme destitution. Some of her relations were killed in the war, and the rest beggared. She hired a room, but had no means to pay more than a week's rent. By the merest chance, at the end of the week, her case reached the ears of two daughters of Israel. They called upon her, relieved her immediate wants, next prepared clothing for her children, and at length, to enable her to obtain a respectable living, proposed to hire for her a small store and stock it with fancy stationery. This being declined, she received from them and a few of their friends \$400 toward carrying on in another place a business she preferred.

May my tongue cleave to the roof of my mouth, if henceforth, I suffer prejudice to blind me to the social and moral virtues of those whose creeds differ from my own.

TWELFTH
ANNUAL REPORT
OF THE
House Physician and Surgeon
OF THE
MOUNT SINAI HOSPITAL.

NEW YORK, 1866-5626-7.

To the Honorable the President and Board of Directors of the Mount Sinai Hospital.

GENTLEMEN:—The undersigned House Physician and Surgeon, has the honor to transmit the following Report for the year 1866—5626—7.

The whole number of applications was 594, out of which there were

Admitted.....	399	males,	131	females,	530	total.
Children born.....	3	“	3	“	6	“
Remaining, Dec. 31, 1865	21	“	12	“	33	“
Total.....	423	“	146	“	569	“
Out-door patients.....	275	“	184	“	459	“
Grand total.....	698	“	330	“	1028	“

Of the patients treated in the Hospital there were

Discharged cured.....	411
" improved.....	63
" not improved.....	6
Left before treatment commenced.....	4
<hr/>	
Total.....	484
Died.....	41
Remaining December 31, 1866.....	44

Of the applicants for admission, 15 were visited before admitting them, and 85 out-door patients were treated at their residences; 63 patients accidentally injured, were admitted during the year.

The largest number of patients in the house at any one time during the year was 54; the smallest 33; the average number of patients $43\frac{1}{4}$; of the patients, 42 were pay patients.

The average time of residence in the Hospital was $13\frac{3}{4}$ days.

The number of deaths was 41, making $7\frac{1}{5}$ per cent. of those treated, and after deducting patients admitted in a dying condition (14), and suffering from incurable diseases (60), the proportion of deaths amounts to $1\frac{3}{4}$ per cent.

The whole number of prescriptions was 7,511, at a cost of \$709,66, making an average price of $9\frac{2}{5}$ cents for the single prescription.

The stock of medicines was augmented with five new preparations, 20 new surgical apparatus were purchased, and 25 books added to the Hospital Library.

The number of consultations was 20, and 123 operations were performed, 10 of which were capital operations.

Compared with last year's report, the number of treated

is this year larger by 137 patients; the number of inmates larger by 115 patients; being an increase of $13\frac{3}{10}$ per cent. on the former, and of $20\frac{1}{2}$ per cent. of the latter.

The average number of inmates was last year $31\frac{1}{2}$, this year $43\frac{1}{4}$; this constitutes a daily increase of $11\frac{3}{4}$, or nearly 25 per cent. of patients to support.

The proportions of deaths was last year $10\frac{1}{10}$ per cent., this year it is $7\frac{1}{5}$, a decrease of $2\frac{4}{5}$ per cent.; at the same time it is proper to remark, that we had at one time 10 cases of typhoid fever in the house, (almost an epidemic,) two nurses caught the disease, one of whom died. The Hospital was kept entirely free of cholera Asiatica, by giving proper attention to the first symptoms of cholerine and diarrhœa, and by using proper disinfectants.

In conclusion, I would call the attention of the Hon. Board of Directors to the accompanying letter of the Medical Staff, condemning the first ward in the building, during the Summer months. The fourth ward cannot be occupied in the Winter unless furnished with stoves, as the furnaces are only capable of producing the proper standard of heat in three wards. The Hospital is therefore unable to accommodate more than 19 female and 50 male patients. The number of applicants is constantly increasing, and it is apparent, that in the course of a few years the accommodations will not be sufficient for the wants of the community.

All of which is respectfully submitted.

DR. S. TELLER,

House Physician and Surgeon.

MOUNT SINAI HOSPITAL, West 23d St.,
New York, Dec. 28th, 1866.

BENJ. NATHAN, Esq.,

President Mount Sinai Hospital,

DEAR SIR—The undersigned, Medical Staff of the Hospital, have to call the attention of the Directors to the bad condition of the first ward in the building; its proximity to the street renders it obnoxious from the effluvia arising from the garbage and its surroundings. The very insufficient ventilation is injurious to the patients and detrimental to the health of the nurses and attendants. The Medical Staff is therefore compelled to condemn this ward during the Summer months.

Yours, respectfully,

DR. E. KRAKOWIZER,
 L. VOSS, M. D.
 CHARLES A. BUDD,
 SAMUEL R. PERCY,
 DR. A. JACOBI,
 ERNST SCHILLING,
 B. I. RAPHAEL,
 DR. S. TELLER.

7 Pneumonia.	

Annexed I mention a few of the many cases of suffering that were relieved at the Hospital during the year.

I.—BAR BARNETT, 72 years of age, suffering from stone in the bladder. Admitted August 26th; discharged cured September 27th, after a successful operation.

Any one the least familiar with the ills to which human nature is subject, knows the suffering which gravel will produce. This old gentleman, whose home is in New Jersey, had that disease for more than two years. During that time an operation was proposed, but sooner than submit to it, he suffered patiently for years the agonies of pain and sleepless nights, until he was persuaded to apply to this Hospital, where he was admitted, operated upon and carefully nursed for four weeks, and left for his home and family a new-born man, restored to health.

II.—ISIDOR ISAACS, 26, and his wife, 22 years, suffering from *Intermittent Fever*. His two children, MAX, 4 years, and EDMUND, 2 years, suffering from *Scrofulosis*. Admitted October 16th; discharged November 18th, 1866.

These few lines contain a story of long suffering. Shortly after their arrival from Europe, this poor family settled on Staten Island. There the father caught the epidemic disease, chills and fever, and was faithfully nursed by his devoted wife. At length he found his health failing, his little savings gone, and moved to the City; but, alas! the mother brought the seed of that plague along, and instead of being a helpmate, she got sick also with the same disease, and both being ashamed to apply for assistance, pawned their all, until starvation was imminent. Then, and not before, they made known their situation to a neighbor, who applied for them at the Hospital. The whole family, almost starved and broken down with disease, were admitted together, the parents treated, the children fed and nursed, and in a short time the whole family became restored to vigor. The father left a few days before the rest to prepare a home for his dear ones, his family following shortly afterwards.

III.—ROBERT BORLAND, 40 years; married; farmer; native of Scotland; residence, Maine; suffering from *Sunstroke*. Admitted July 17th; discharged July 19th, 1866.

It is a well known fact that instant and efficient help can effect much in this disease, while on the other hand, the slightest negligence causes death in a short time. We could mention several cases that came under our observation during the extreme heat of the last Summer to prove this fact. We will mention one case out of many. The above named gentleman,

a healthy, robust farmer from Maine, made a trip to Europe, accompanied by his wife, and returned on one of the hottest days of the season. Being very active, he had his baggage carried for transportation to his distant home, and waited for the starting of the train in the Depot of the Hudson River Railroad. There he was taken with *coup du soleil*. The police removed him instantly to the Hospital, where his wife assisted in nursing him. Only by the greatest exertion on the part of all in the house was he restored to consciousness in the course of a few hours; next day he was already able to walk in the yard, and on the following morning he continued his way homewards.

IV.—MORRIS SONNEBERG, 15 years; *suffering from Fracture of Leg, Compound Fracture of the Nose, and Dislocation of the Big Toe. Admitted July 18th; discharged November 8th, 1866.*

This young boy received his complicated injuries by sleeping, one of the hot summer nights, on the roof of a five-story tenement house in Bayard Street. While dreaming, he rolled to the edge of the roof, and fell to the pavement. Being picked up by the police, he requested to be brought to this institution, where he was treated some time before for a different ailment. Admitted shortly after midnight, his wounds were instantly dressed, and his injuries, some of which are rarely met with in surgical practice, were treated so that he gained the full use of his limbs.

V.—TOVE NEGALE, 10 years; *from Italy; suffering from Fracture of Leg. Admitted August 25th; discharged October 7th, 1866.*

The subject of this sketch, a fine looking boy, lately arrived

from Italy, where his father had died on the battle-field. He made his living by playing the violin on the street corners. This day he tried his luck in one of the cars of the 10th Avenue Railroad; being ordered to leave the car, and not understanding the language, he was pushed forwards and jumping from the front platform, fell and fractured his leg. The mental agonies of this boy were pitiful indeed, and it was only after the lapse of several days, when he got used to his surroundings, and was spoken to in his native tongue, he could be induced to eat; but from that time he recovered rapidly, and is now able to resume his old vocation.

VI.—HANNAH MITCHELL, 16 years; *suffering from extensive Burns. Admitted July 23d; discharged September 7th, 1866.*

This young woman was, with several others, the victim of one of those sad accidents that occur so often in this metropolis. Living with her parents, whose principal support she is, in the rear building of a tenement house in Leonard Street, she was about to prepare breakfast on a furnace in the yard, when the boiler in the adjoining steam factory exploded. Being directly in the way of the escaping steam, she was severely burned on the face, and all over the upper part of the body. Being the only Jewess of all injured, which were brought to the nearest hospital, she requested the police to remove her to this institution, where she was admitted in a pitiful condition. Only the greatest care, the strongest stimulants, and afterwards the best nourishment, saved the life of this patient, the only survivor of all the injured by this accident. When she left she was restored to health, to the full use of all her limbs, and in a short time no traces will be left to spoil the appearance of her face.

VII.—JOSEF BEST, 8 years; *suffering from Necrosis of the Thigh. Admitted September 20th; discharged December 28th, after Amputation of the Thigh.*

This boy is the only son of a poor Jewish widow. While playing, he was struck by a ball in the thigh, inflammation set in, large abscesses formed, and the formally stout boy was reduced to a skeleton in the short space of a few weeks. In this condition the mother brought him to the Hospital. A consultation of the surgeons decided to amputate the limb to save his life, the mother consented, and the operation was performed. A few days brought a great change for the better, the wound healed kindly, and at the time of his discharge he was the object of admiration of all visitors. His red cheeks had returned, he regained his strength, and was as joyful and playful as in former times. Being restored to health he was given in charge of the Directors of the Hebrew Orphan Asylum.
